SUMMARY

An Informatics Engineering student at Airlangga University with hands-on experience in programming and completed projects involving software development. Experienced in projects such as application development, website development, and software testing and management. Demonstrated expertise in databases, cybersecurity, computer networks, and operating systems through the successful implementation of [number] complex projects. Active in committees and project collaborations, she is accustomed to working in teams and managing shared responsibilities.

EDUCATION

STATE SENIOR HIGH SCHOOL 1 BABAT | SCIENCE

- Top 5 in class throughout the study period.
- Graduated through the National Student Admissions Program (SNBP).

Aug 2020 - June 2023

Airlangga University | D4 Informatics Engineering

Aug 2023 - Present

- Developed and implemented algorithms, designed and managed databases, created intuitive UI/UX prototypes, built front-end and back-end features, assessed cybersecurity risks, configured operating systems, and analyzed computer networks in hands-on projects.
- Completed various academic projects in programming and systems development.
- Active in the Student Association (HIMA) and Student Activity Unit (UKM).

PROFESSIONAL EXPERIENCE

Informatics Engineering Student Association | Transportation Division | Internal Expert Staff

January 2025 - Present | Airlangga University, Surabaya, East Java.

- **Bridged communication** between student associations, academics, and 200+ students in the department via official WhatsApp channel.
- **Shared** internship, scholarship, and study program information, reaching the entire student body of the program (± 400 students) through WhatsApp announcements and events.
- **Welcoming new students** and supporting Graduation Party events.

Tapak Suci UKM | Human Resources Development Staff

January 2025 - Present | Airlangga University, Surabaya, East Java.

- **Implemented performance evaluation processes** to assess and improve the effectiveness of administrators and members.
- **Organizing internal** activities and new student programs.

SKILLS

Soft Skills

- **Communication** – Building bridges of communication between student associations, students, and academics.
- **Leadership & Teamwork** – Leading and collaborating within Student Associations (HIMA), Student Activity Units (UKM), and event teams.

- **Event Management** – Planning and executing events on campus and at the national level.
 - **Problem Solving & Adaptability** – Finding practical solutions and adapting to changing circumstances.
- Hard Skills** :
- **Algorithms & Data Structures** – Master programming logic and data structures for system development.
 - **Database Management (SQL, MySQL)** – Design and manage databases for web applications.
 - **Back-end Development (PHP, Laravel, Node.js)** – Create server-side logic and APIs.
 - **Front-end Development (HTML, CSS, JavaScript, React)** – Create interactive interfaces according to UI/UX principles.
 - **Cyber Security (Basic)** – Understand the basic concepts of system security and data protection.
 - **Operating Systems & Computer Networks (Basic)** – Understand the basics of system and network administration.
- Software Skills** :
- **Development:** VS Code, XAMPP, Laragon
 - **Design & Modeling:** Figma, Draw.io, Flowgorithm
 - **Version Control & Deployment:** GitHub, Railway
 - **Database & Backend:** MySQL, PostgreSQL, MongoDB, Supabase, PocketBase (MySQL Workbench, PgAdmin)
 - **Testing & API:** Postman
 - **Office & Productivity:** Microsoft Office, Google Spreadsheet
 - **Virtualization & Networking:** VirtualBox (Linux), Winbox
 - **Programming:** PHP (Laravel), Golang, SQL, NoSQL

TRAINING

Code Generation and Optimization using IBM Granite | IBM SkillsBuild

Learn how to create simple code and create simple website projects.

CERTIFICATION

Primary Mobile Programmer, National Professional Certification Agency, Number 62019 2514 3 0146540 2025, 2025.

ACADEMIC PROJECTS

- **Java Frontend & Backend Development** – Built applications using Java for both client-side and server-side logic, applying object-oriented programming concepts.
- **Laravel RESTful CRUD Website** – Developed a CRUD-based web application with Laravel, integrating RESTful APIs for secure and efficient data operations (without raw queries).
- **Full-stack Laravel Website** – Designed and developed a full-stack web application with authentication, database management, and user interaction features.
- **Website UI/UX Design** – Created responsive interface designs using CSS and frontend best practices, following UI/UX principles.
- **Software Requirement Specification (SRS)** – Authored SRS documents to define project requirements and workflows, improving communication and project clarity.
- **Software Quality Assurance Project** – Conducted quality control, software testing, and applied quality assurance practices to ensure system reliability.
- **AI Expert System (Backward Chaining)** – Built an expert system utilizing the backward chaining method for decision-making support.
